

Researching unethical cases

You and a partner will research one of the cases on this sheet. You will be assigned one of them. Your research must include; a brief description of the case, what the hypothesis is, whether or not the hypothesis was proven and whether or not the person(s) doing the research got into any trouble.

The brief description needs to answer the questions; who, what, when, where, and why. (There may be some slight overlap with the hypothesis portion.

The cases are:

Stanford Prison Experiment

Little Albert

Rosenham Experiment

Milgram Experiment

Hawthorne Effect

Nazi Medical Experiments

Tuskegee Institute Syphilis Study

Tea Room Sex Study

Willowbrook State School Hepatitis Experiment

The Monster Study

The Aversion Project

Monkey Drug Trials
